Laurent Bécherel

Software Engineer

becherel.laurent@gmail.com linkedin.com/in/laurentbecherel

Software engineer passionate about crafting tools that empower creativity. My journey from gameplay programmer to XR developer has evolved toward AI-driven solutions. I thrive on building intuitive experiences that bridge human intent and technology.

Experience

Senior Software Engineer

Meta · Zurich, Switzerland — 2022 — Present

- Defining AI strategy for builder tools across Meta XR SDK, aligning engineering with product and design on upcoming features
- Driving ease-of-use and discoverability improvements for XR features in Meta XR SDK, collaborating across teams to reach 50K+ developers
- Shaping New-User Experience design to improve developer onboarding
- Building telemetry to enable metric-driven decisions across engine integrations
- Advocating for Developer Tools at GDC, Meta Connect, etc. through tech talks, demos and workshops

C++ · C# · Unity · Unreal · XR · Full Stack · Python · MCP

Co-Founder

RedBamboo Interactive · Avignon, France — 2017 — 2022

- RBP1 (Unreleased PC Title): Led production and developed gameplay, rendering, tools, and procedural generation systems
- RedLeaf (Development Tool): Created visual scripting and content management system adopted by third-party partners
- ISSAN (Aerospace Contract for Spaceable): Designed UX and PoC supporting two fundraising rounds; built engineering simulation tools

C++ · C# · Unity · UX · Full Stack · Procedural Generation

Senior Programmer

Codemasters · Birmingham, UK — 2012 — 2017

- Micro Machines World Series (Xbox One, PS4, Steam): Designed monetization and retention systems driving player engagement
- Micro Machines (iOS, Android): Built end-to-end monetization with analytics integration
- Toybox Turbos (X360, PS3, Steam): Developed gameplay and metagame systems
- F1 Race Stars (X360, PS3, Steam, iOS): Shipped gameplay and monetization systems

C++ · C# · Unity · Analytics

Gameplay Programmer

Ubisoft · Milan, Italy — 2010 — 2012

- Raving Rabbids: Alive & Kicking (Xbox 360 Kinect): Leveraged Kinect capabilities for depth feed analysis, gesture recognition, and adaptive AI gameplay
- MotionSports (Xbox 360 Kinect): Architected save and player profile systems; ensured TCR compliance

Ubisoft · Paris, France (Intern) — 2009 — 2010

- Red Steel 2 (Wii): Implemented save/checkpoint systems and menu controls; ensured Lotcheck compliance

C++ · Kinect · Wii

Education

Telecom SudParis

Institut Polytechnique de Paris · Evry, France — 2006 — 2010

- M.S. in Telecommunications Engineering, with coursework in management and software development

C++ · A.I. · Distributed Systems · Concurrent Programming · Probability · Project Management
